Prepared by the Special Populations Collaborative Project (with funding from Carl D. Perkins Career and Technical Education Act of 2006 grants 07-165-001 and 08-165-001, awarded by the California Community Colleges Chancellor's Office to West Hills Community College District). 2008

**California Community Colleges
Programs Classified
as Nontraditional**

Taxonomy of Programs (TOP) Ver. 6

Introduction

The Carl D. Perkins Career and Technical Education Act of 2006 (Perkins IV) places an increased emphasis on training students for nontraditional careers. The Act defines a nontraditional career as any career in which fewer than 25% of the employees are of a single gender and holds states and districts accountable for meeting targets to train students for careers that are nontraditional for their gender.

To assist local districts and colleges in identifying career and technical education (CTE) programs that are considered nontraditional, the Special Populations Collaborative Project has combined federal/national data resources with the California Community Colleges Chancellor's Office (CCCCO) Taxonomy of Programs (TOP) classification system to prepare a Table of Non-traditional Programs by TOP Codes.

Development of the Table

The project utilized two public resources recommended by the federal Office of Vocational and Adult Education (OVAE):

- Nontraditional Occupations for Females from 2006 Bureau of Labor Statistics (BLS) Data, prepared by the National Alliance for Partnerships in Equity (NAPE), 6-1-07
- Nontraditional Occupations for Males from 2006 Bureau of Labor Statistics Data, prepared by the NAPE, 6-1-07

The NAPE documents list the career areas in which the percent of female or male employees is less than 25%. The NAPE nontraditional documents are available online at <http://www.edcountability.net/crosswalks.cfm>. These documents were constructed using the federal

Standard Occupational Classification (SOC) codes. The SOC codes were further linked to the National Center of Education Statistics' Classification of Instructional Program (CIP) Codes to which CCCCCO Management Information System (MIS) data are linked through TOP codes.

To determine which TOP code programs prepare students for careers that are nontraditional to their gender, the NAPE SOC-CIP 2000 nontraditional occupations tables were electronically linked to the CCCCCO TOP Codes Ver. 6 CIP-TOP crosswalk developed by the Academic Affairs Unit.

Additional minor adjustments were made to the CIP-TOP crosswalk to correct anomalies that surfaced during the process.

Format of the Table

Under each two digit TOP code discipline heading are:

- the six digit occupational TOP code deemed nontraditional,
- the corresponding instructional program title, and
- the applicable nontraditional gender.

Please note the gender determinations are based on national employment data, not data specific to California.

Another version of this table is available online at:
